WORK EXPERIENCE

Financial Analyst

Contract November 2025

PSRB Law | Springfield, MA

- Developed financial models supporting a \$300,000 annual investment decision, including cost projections, break-even analysis, sensitivity analysis, and return-on-investment evaluation.
- Organized and maintained operational, productivity, pricing, and margin data to support financial analysis and management reporting.
- Analyzed costs, demand, capacity, and profitability to identify financial risks and recommend against a negative-return investment and prepared executive summaries and financial briefings for internal stakeholders.

Market Research and Materials Developer

Contract October 2025

Post Game Financial | East Longmeadow, MA

- Prepared market reports and management briefing materials using quantitative research and financial data.
- Collected, analyzed, and organized market information to support business planning and management decisions.
- Translated quantitative findings into clear client-facing reports, presentations, and written materials.

Landscaping Manager

May 2018–August 2023

Dream Green Landscaping | Longmeadow, MA

- Managed contracts and projects valued up to \$19,000; Prepared project quotes, budgets, material estimates, and cost projections and monitored project costs and resources across multiple concurrent projects.
- Served as the primary contact for clients, employees, and external stakeholders and coordinated compensation and scheduling for more than 15 employees.

PROJECTS

Modeling Land Value Tax (LVT) in Allegheny County

December 2025

Pittsburgh, PA

- Collected, cleaned, and organized property, tax, and market data for quantitative financial and economic analysis.
- Built models to evaluate land-use policy, property values, and potential tax impacts and prepared analytical findings based on large and varied datasets.

Lowercase AI Legal Platform

January 2025–August 2026

Longmeadow, MA

- Built an automated data workflow that reduced document-processing time from approximately two hours to less than ten minutes.
- Developed processes to ingest, clean, organize, and validate large datasets, improving data organization and reporting efficiency for downstream analysis.
